# Challenges Facing U.S. Plan Sponsors

#### Lack of Income Adequacy

Lowering of benefits and poor individual choices in DC hurting outcomes

Shortfall for average American of 3.2x wages at age 67 versus need of 11.1x. 81% of people projected not to meet Retirement Savings needs by age 67.

#### Gender Gap

Gender retirement savings gap in U.S. now at 34% (versus 18% pay gap)

Challenges related to move to DC when women live longer; designs favoring those without career breaks, conservative decision making and barriers to saving.

#### Safety Net Weakness

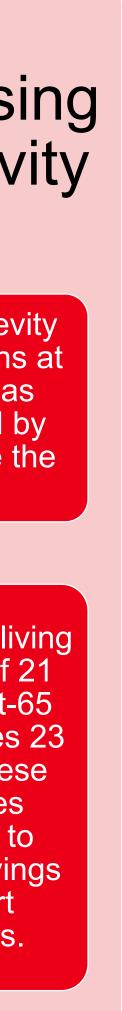

Social Security reserves exhausted in 2034; Medicare in 2028

While ongoing taxes will cover much of shortterm needs (up to 80% of Social Security) changes are needed and likely to impact younger generations.

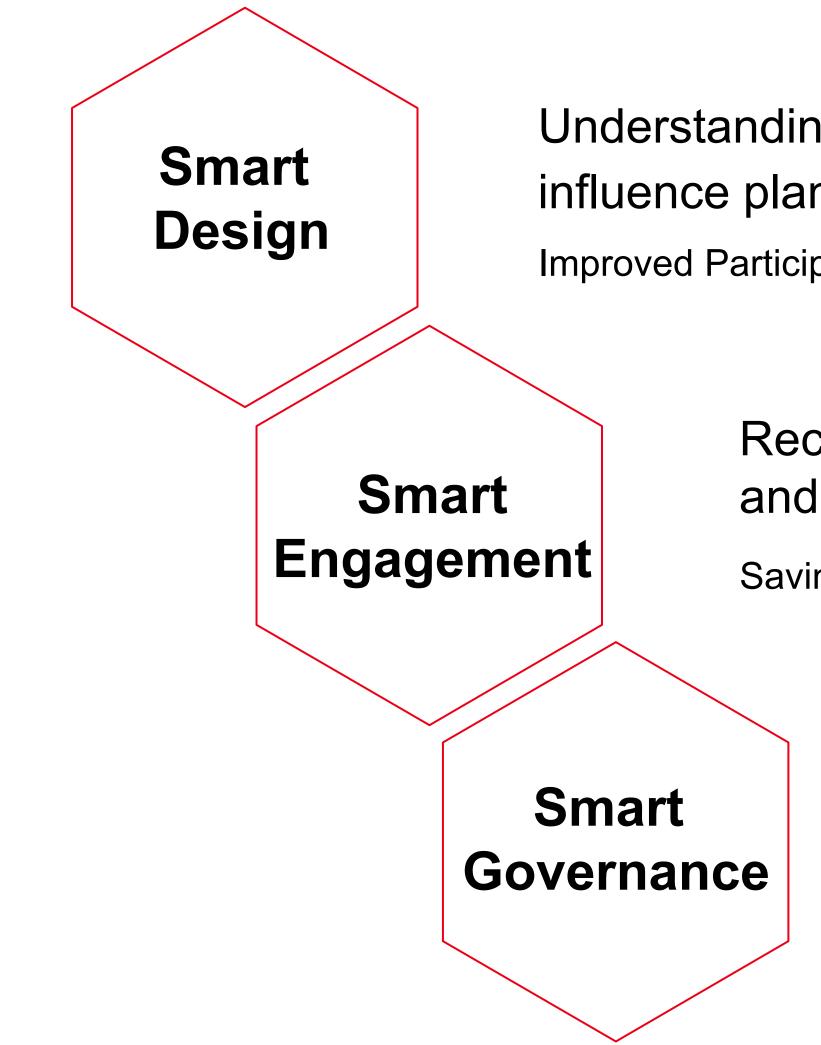

#### Increasing Longevity

Male longevity assumptions at age 65 has increased by 37% since the 1980s

Males now living average of 21 years post-65 and females 23 years. These increases continue to impact savings and hurt sponsors.

### **Aon's DC Point of View**

Understanding how employees make decisions should influence plan design and implementation models Improved Participation | Higher Savings | Better Returns

Recognize broader financial circumstances and make it easy to make good decisions

Savings Options | In-service Access | Distributions

Follow a process that demonstrates comprehensive plan management including Pooling Compliance | Plan Fees | Fund Selection
